Reasons of Allowance

The Status of Claims

Claims 1-10 are pending.

Claims 1-10 have been allowed.

- I. The following is an examiner's statement of reasons for allowance:
 - The close reference for the current invention is Shi et al (Tetrehedron 55 (1999) p. 909-918).

Shi et al teaches the preparation of a (bis-trifluoromethyl)phenyl)-acetic acid in the following steps:

- a. converting bis-trifluoromethyl benzene to bis-trifluoromethyl
 benzyl lithium in the presence of butyl lithium and THF;
 b. converting bis-trifluoromethyl benzyl lithium to the
 corresponding Grignard reagent through transmetalation with
 magnesium chloride;
- c. alkylating the corresponding Grignard reagent with allyl bromide to produce an olefin;
- d. obtaining the desired (bis-trifluoromethyl)phenyl)-acetic acid from reacting the olefin with ruthenium chloride and sodium periodate.

Application/Control Number: 10/680,025

Art Unit: 1625

The instant invention, however, differs from the prior art in that the claimed initial step is related to the reaction of bromo-trifluorobenzene with magnesium chloride unlike the reaction of bis-trifluoromethyl benzene with butyl lithium in the prior art; the claimed procedure is involved in only two steps instead of the four steps in the prior art. Their processes are completely different from each other. In addition, unless all limitations of the claims are met, there is no prior art rejection. See In re Zurko 59 USPQ 2d 1690 (Fed Cir. 1991) and In re Lee, 61 USPQ 1430 (Fed Cir. 1991).

Therefore, the claimed invention would not have been obvious to the person with an ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning the communication after allowance such as sending all post-allowance correspondence should be directed to "Box Issue Fee" or faxed directly to PUBS at 703-305-8755. This will expedite the process of these papers.

Application/Control Number: 10/680,025

Art Unit: 1625

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
